

# S6024 Rackmount Extended Storage

GVD Extended Storage Server S6024 has 24 hard disk trays at its front to add 240TB to a True Enterprise NVR. Simply connect an S6024 to a True Enterprise NVR (M6024 for example) by the SAS connectors at their rears to boost the storage of the NVR to 480TB. Together they bring an ideal solution for the large-scale or mission-critical projects that need to be online around the clock. They are your best choice for shopping complexes or large banking business.

| Product     | S6024                    |                               |
|-------------|--------------------------|-------------------------------|
| System      | Name                     | Extended Storage (DAS Server) |
| Storage     | interface                | 3.5" SATA HDD                 |
|             | HDD trays/bays           | 24 pcs (hotswappable)         |
|             | Capacity                 | 240TB (24 x 10TB)             |
|             | RAID level               | Depending on the host         |
|             | Recording capacity       | 240TB (24 x HDDs)             |
| Power       | Voltage                  | 100~240 VAC, 50-60 Hz         |
|             | Redundancy               | Yes                           |
|             | Consumption              | 202W                          |
| Environment | Operating temperature    | 5°C ~ 35°C (41°F ~ 95°F)      |
|             | Storage temperature      | -40°C ~ 70°C (-40°F ~ 158°F)  |
|             | Operating humidity       | 8% ~ 90% (non-condensing)     |
|             | Storage humidity         | 5% ~ 95% (N/An-condensing)    |
| Mechanic    | Dimensions(W)x(H)x(D)    | 437 x178 x 660 mm             |
|             | Net weight (without HDD) | 34 Kg                         |
|             | Chassis                  | 4U rackmountable chassis      |
