## GVD at Taipei Automation in 8/20 ~ 8/23

### GVD and Solomon Redefine Smart Surveillance with AI-Powered VMS at Taipei Automation 2025

**TAIPEI, TAIWAN – August 28, 2025** – Genius Vision Digital (GVD), a global innovator in enterprise Video Management Systems (VMS), and **Solomon Technology Corporation (Solomon)**, a leader in industrial AI and 3D vision, today announced a highly successful joint exhibit at the **Taipei Automation Show 2025**, held from August 20th to 23rd at the Taipei Nangang Exhibition Center.

The event, which stands as Taiwan's most important industrial exhibition outside of the **Taipei SEMICON Show**, served as the launch platform for an unprecedented integration between enterprise security and industrial augmented intelligence.

### **VMS 4.0 Meets META-aivi: Bridging Security and Industry 5.0**

GVD showcased its latest flagship solution, **VMS 4.0**, featuring revolutionary **AI metadata search functions**.

This new VMS capability was demonstrated in conjunction with Solomon's award-winning **META-aivi** (AI Augmented Intelligence Solution), creating a powerful synergy that attracted significant attention from industry leaders and media.

The joint solution effectively bridges the gap between conventional physical security and advanced industrial operations by utilizing AI-generated metadata.

VMS 4.0 allows users to conduct rapid, forensic searches across vast archives of video footage based on specific AI-detected attributes—such as object type, meter number, shape, color, or location, while META-aivi focuses on empowering frontline workers with AI-powered guidance and inspection through augmented reality (AR) devices, IP cameras, and smart devices.

"The volume of traffic to our booth was a clear signal: the market is ready for deeply integrated AI solutions that serve both security and operational efficiency," said GVD CEO Steve Chu.

"By integrating VMS 4.0 with Solomon's META-aivi, we demonstrated how enterprise surveillance can evolve from a reactive tool into a proactive source of intelligent operational data, greatly accelerating investigation time and enabling smarter factory management."

### **Introducing Solomon Technology Corporation**

**Solomon Technology Corporation**, founded in 1973 and publicly listed on the Taiwan Stock Exchange since 1996, is a global leader in industrial AI vision & Robotics systems.

Headquartered in Taipei with offices worldwide, Solomon is dedicated to developing cutting-edge technologies, including industrial IoT, machine vision, and robotics.

Their META-aivi solution is an Augmented Intelligence platform that combines AI and AR vision systems.

It provides applications such as AI recognition, counting, defect detection, and SOP (Standard Operating Procedure) validation for manufacturing, logistics, and petrochemicals.

By leveraging META-aivi, GVD's VMS can now process, index, and analyze video data with industrial-grade precision.

The success at the Taipei Automation Show confirms the strategic value of this partnership, positioning GVD and Solomon to lead the charge in integrated AI solutions for the future of smart manufacturing and enterprise security.

**### About GVD (Genius Vision Digital)** GVD is a premier developer of enterprise-level VMS solutions, dedicated to delivering robust, open-platform software for mission-critical security environments worldwide.

**### About Solomon Technology Corporation** Solomon Technology Corporation is a global leader in industrial robotics & AI vision, augmented intelligence solutions, committed to boosting productivity and operational efficiency across diverse industries.
